THS Server Racks

The THS line of customized server racks are ultra-heavy-duty work environment platforms that offer the option of fixed or locking slide-out shelves. Super-rugged and built to last - designed and manufactured right here in the USA. The THS server rack line includes standardized rack mount features and special seismic mounts. This is not your typical static cabinet.

***Customizable Modular Workstation
and Server Rack Solutions***

FEATURES:

Ultra-heavy-duty pullout shelves provide easy front and back access, and feature locks for added security.

Chassis can be mounted on three sides when configured without side panels.

Standardized universal mounting brackets.

12-gauge steel construction makes the SMI line much more durable than typical 14-gauge racks.

Oversized to accommodate various server chassis form factors.

Durable shelves, in either 23" or 25" widths, can support over 250lbs at full extension.

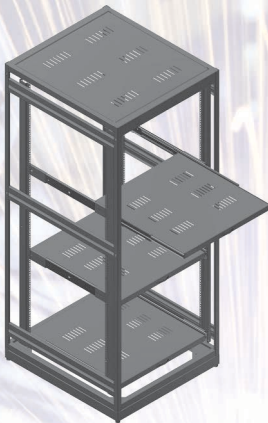

BENEFITS:

Extreme durability gives you toughness you can count on for your exceptionally demanding applications.

Simplified, elegant design gives you the flexibility and adaptability you need.

Ability to configure rack mount capacity up to 44U (77"), using standardized rack mounting.

Special seismic mounts available for increased immovability.
