

Things to consider when selecting your workstation:

1. Determine what you will be doing at this workstation.
2. Consider what specific features need to be included and functions need to be able to take place at this workstation.
3. As you determine your specific workstation needs, keep in mind the flow of individuals and materials around this workstation.
4. Keep in mind the type of storage needs you currently have or anticipate having.
5. Decide what need and how you need to be able to access your electrical outlets.
6. As you design your workstations, will you need additional lighting?
7. Will you want a more readily adjustable ergonomic sit/stand feature or will the height be fixed? (THS, by its very nature, is ergonomic as it is highly adjustable. The Sit/Stand workstation will give you a more immediate ability to adjust for various needs.

The THS system is modular and can be easily configured and reconfigured to adapt to your changing workspace requirements. If you are not sure what you want or need, we are happy to be of assistance.
